

Visibility and Execution Agility by Workflow Analytics

Gain visibility by creating a replica of your operations in the virtual world. ASSET-Rx™ platform provides Workflow Analytics for visibility, traceability, and reduction of risk. It functions as an “API call to the physical world”, enables autonomous generation, ingestion, and digestion of information, using AI and providing predictive analytics.

- Real-time reporting of assets and personnel locations, activity levels for safety and operational efficiency
- Analytics to help understand inventory condition, flow, custody and handling quality
- Increasing the safety of the workplace and productivity of the personnel
- Reducing risk by identifying personnel, assets and inventory “at risk”

Enterprise Solutions in Manufacturing, Packaging, Warehousing, Supply Chain and Logistics, Repair and Maintenance, Facilities and Construction operations.

Solve the last yard problem using ASSET-Rx platform with integrated sensors. We enable companies to connect business and operational intelligence tools and software to the physical world, acquire the real-time position, condition, and custody information of inventory and assets. The real-time or historical location and condition of the assets which make up the workflow are accessible from the ASSET-Rx by a GUI or an API.

Maximize Data Accuracy by using platform-integrated sensors, tags, barcodes, and QR codes. “All in One” system eliminates the need for pen and paper recording or pushing spreadsheets. Eliminate reporting delays, errors and automate for consistency.

Gain Full Visibility over Inventory, Assets, and Operations by monitoring anything and everything. Analyze outcomes, record and streamline operations. Enjoy data real-time, react in no time, reduce risk.

Connect Everything and Everyone with a lightweight infrastructure. Even human and machine-readable displays come pre-integrated into ASSET-Rx.

Seamless Indoor-Outdoor Location information delivered second by second. Where? How? And Who? Answers available real-time.

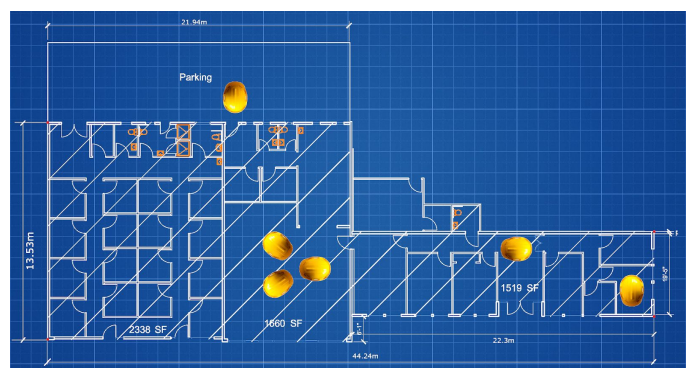

Workplace Environmental Condition Information ensures the safety of the workplace and quality of handling of the assets. Access to temperature, humidity, gas, ambient light, pressure, sound, motion, shock, and

extracted context information. Reduce risk and react to hazardous conditions for the well being of your team.

Facility Utilization & Access Analytics

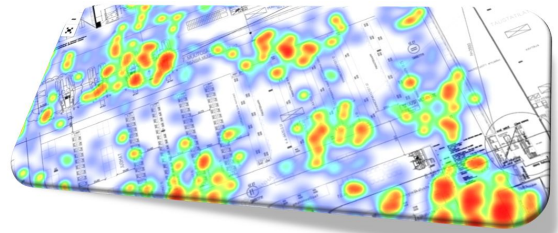

Track facility utilization and occupancy second by second. Distribute the cost of ownership of assets such as buildings, common areas, warehouses, meeting rooms, by cost center, department, by employee.

- Generate arrival and departure records of employees without having to physically check in to the system.
- Monitor access to restricted areas by user access levels and generate customizable notifications.

- Cover areas that require privacy where cameras cannot be installed.
- Optimize and schedule janitorial services by utilization.
- Monitor physical security coverage real-time.

Generate usage heatmaps of the factory floor, assets, inventory, and personnel locations. Heatmap views are used to eliminate congestion, enable efficient use of the facility and avoid accidents.

Integrate with ERP or use ASSET-Rx dashboard. Simple APIs for leading ERP packages enable your team to gain visibility using the tools they are most familiar with.

Wireless Gateways and Sensors with a variety of functions and form factors come integrated to ASSET-Rx. The familiar form factors are the access badge, the badge holder and keychain. Provision sensors as RFID-NFC access badges for access control, compatible with existing systems. Most models operate with a primary coin cell battery and feature 2-year typical battery life.

Many Form Factors, Functionality and Performance to Choose From
